DRAPERIES

MODEL 475, 140-S OR PROGRESS 25/50/80

When interfacing with a home theater, multi-room control system, or whole-house automation system; two (2) momentary dry contacts (switching contacts with no voltage inputted) are required for open-stop-close (two button) operation.

Stop Function:

For Model 140-S, close the open/close contacts simultaneously or trigger the opposite direction contact for the “Stop” function.

For Model 475, operation initiates with either the “Open” or “Close” contact, and a second action with either contact produces the “Stop” function.

For Progress 25/50/80 Ti-RF, close the open/close contacts simultaneously for the “stop” function.

All drapery motors are “Smart Motors,” designed with built-in logic boards.

They are all fully compatible with all major control systems, including those manufactured by AMX, Control4, Crestron Electronics, Lutron Electronics, Savant, and Vantage.

*Recommend use of a Surge Protected
110 VAC duplex outlet.*
